

Name:XXX
Email: XXX
Mobile No: XXX

Professional Summary:

- **Around 4+ years** of IT Experience as a **Power BI, Microsoft SQL Server 2012/2008** in Development.
- Experience with **T-SQL** in constructing **Tables, User Function, and Views**.
- Experience in Using multiple **join statements** to retrieve data from **multiple tables**
- Experience in writing **Programs** for implementing **Stored Procedures** for different tasks. Worked with Development teams in relation to application tuning.
- Worked on DAX expressions like **filters, aggregate and mathematical functions** etc.
- Expert knowledge in creating **Drill through** reports, **Drill down** reports, **Parameterized and Cascading** reports.
- Proficient knowledge in providing Security to the reports and deploying Projects.
- Created new calculated column and measure using DAX expression.
- Comfortable in working with **filters/calculated columns/measures/relationship and transformations** of edit query section.
- Created Dashboards with different style using Power BI components like Pie charts, Bar charts, Line, KPI Visuals, Custom visuals, etc.
- Published reports into Power BI publisher and schedule the data sets, providing row level security.
- Automated Power Query refresh using Gateways
- Experience in taking Database backups and restoring them, also created jobs for regular backups and monitoring the performance.
- Highly experienced in generating automated mails from SQL Server for various purpose like monitoring jobs.

Technical Skills:

Databases	SQL Server 2008 R2/2012
Operating Systems	Windows NT/98/ 2000/XP/Vista/2003, MS-DOS
OLAP/Reporting Tools	Power BI
SQL Server Tools	SQL Server Management Studio

Work Experience:

Currently working as Software Engineer in **Cyber Best Technology Private Limited** from **Jan 2017 to May 2021**.

Client: GSK

Aug 2019 to May 2021

Role: SQL Server, Power BI developer

Company Domain: Pharma

Description:

GlaxoSmithKline plc (GSK) is a British multinational pharmaceutical company headquartered in London, England.[4] Established in 2000 by a merger of Glaxo Wellcome and SmithKline Beecham, GSK was the world's sixth largest pharmaceutical company according to Forbes as of 2019, after Pfizer, Novartis, Roche, Sanofi, and Merck & Co.

Responsibilities:

- Collaborates with business analysts, subject matter experts, and other team members to determine data extraction and transformation requirements.
- Experience in creating database Objects like Tables, Stored Procedures, Views, Triggers, user defined data types and functions.
- Build and maintain SQL scripts, indexes, and complex queries for data analysis and extraction.
- Building and maintaining SQL scripts in Microsoft SQL server for various projects as well as maintaining them.
- Designing, developing, and maintaining complex SQL queries for data analysis and data extraction as per client requirements.
- Analyzing large and complex systems to determine performance bottlenecks, application bugs, and suggesting ways to improve efficiency.
- Executing the code to ensure it gives desired results, and performing debugging for removing errors.
- Developing and updating database as well as merging collected information from old to new systems as required.
- Developed Power BI model used for financial reporting of P & L and Headcount.
- Designed and documented the entire Architecture of Power BI Poc.
- Expertise in writing complex **DAX functions in Power BI and Power Pivot.**
- **Automated Power Query refresh using power shell script and windows task scheduler.**
- Used various sources to pull data into Power BI such as Sql Server.
- Installed and configured Enterprise gateway and Personal gateway in Power bi service.
- Created Workspace and content packs for business users to view the developed reports.
- Scheduled Automatic refresh and scheduling refresh in power bi service.
- Wrote calculated columns, Measures query's in power bi desktop to show good data analysis techniques.
